Plant IT-Solutions

3D DataManager Pro for SmartPlant® 3D

Features:

- Extends 3D DataManager Reporter
plus
- **Writes back** updated data to Intergraph SmartPlant® 3D
- Detailed reporting for write back function
- Import Microsoft® Excel files to Intergraph SmartPlant® 3D
- Write back data without any knowledge of the data structure of SmartPlant® 3D
- Supports Intergraph SmartPlant® 3D user privileges

Benefits:

- Efficient way to update and repair data in a project
- Handle mass data rapidly
- Efficient project control and management (e.g. approval status)

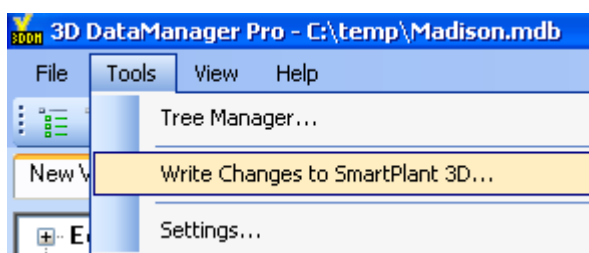

3D DataManager Pro – update Intergraph SmartPlant® 3D data on-the-fly

- **3D DataManager Pro** quickly and automatically updates data in an Intergraph® SmartPlant® 3D project from a Microsoft® Excel file.
- **3D DataManager Pro** is a Microsoft® Windows based application which does not require any CAD or SmartPlant® 3D knowledge in order to update and manipulate project data.
- **3D DataManager Pro** writes back a simple data structure to a complex project structure.
- **3D DataManager Pro** includes a user friendly GUI. Using the unique CAXperts technology, ad-hoc database queries can be updated by any-

Area System	Pipeline System	Design Maximum
Refining Area		
Refining Area	CWR-010	100.0
	CWR-011	100.0
	CWR-012	
	CWR-013	150.0
	CWS-001	
	CWS-003	
	CWS-004	
	GWR-001	
	GWR-002	
	GWS-001	

3D DataManager Pro

- extremely user-friendly
- no database knowledge required
- no training required
- common file type (.xls) for simple SmartPlant 3D project update

Area System	Pipeline System	Old Value_of_Desig	Design Maximum	Update Status_of_
