

FreeReporter – generate reports from Intergraph® applications

Introduction:

FreeReporter is a free utility provided by CAXperts that allows users to simply generate pre-formatted reports from a number of Intergraph applications and export them to Microsoft Excel.

Simple to setup and use:

FreeReporter is extremely simple to setup and use. No installation is required; the application is provided as a single .EXE file. The user selects the project to report on and the report output they require and the report is generated directly from the live database. There is no configuration or setup needed.

Works with many applications:

Just like its big brother, the **UniversalReporterSuite**, **FreeReporter** generates reports from a number of different Intergraph applications through a single standardised user interface. Supported applications include...

- SmartPlant® P&ID
- SmartPlant® Electrical
- SmartPlant® Instrumentation
- Smart® 3D

Pre-configured reports:

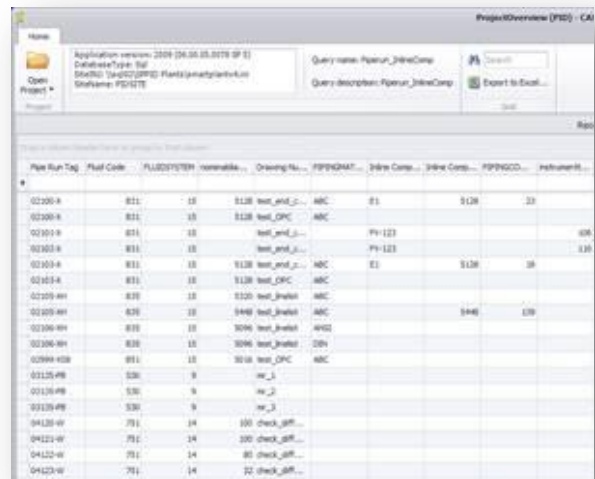

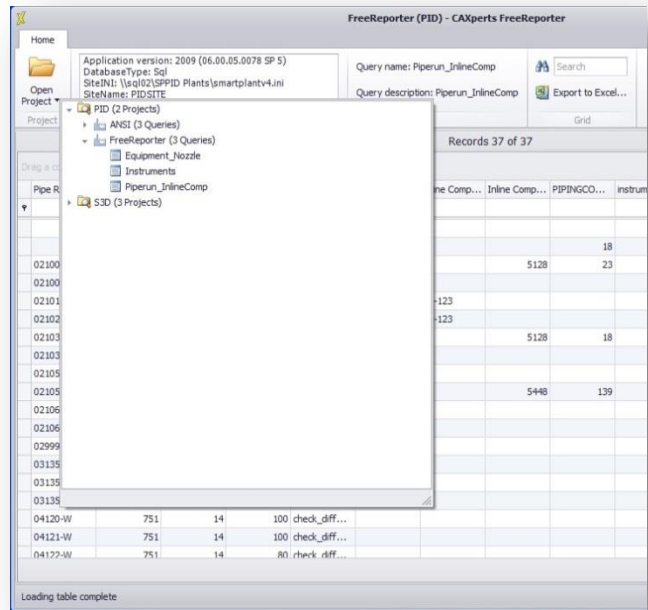

FreeReporter has a number of preconfigured/hardcoded reports which are accessed from a drop down list. Once the reports have been generated, they can be exported directly to Microsoft Excel. Reports available include...

Smart 3D:

- Equipment Material Take-Off
- Equipment nozzles
- Piping Material Take-Off
- Piping pipelines

SmartPlant® P&ID:

- Equipment nozzle and nozzle data
- Pipe run and inline component data
- Instruments

SmartPlant® Electrical:

- Cable
- Electrical equipment

SmartPlant® Instrumentation:

- Instrument loop
- Cable

Benefits:

FreeReporter is a free utility that allows you access to simple reports from different Intergraph applications through a single, easy to use interface.

- No installation
- No configuration
- Export all reports to Microsoft Excel
- **FreeReporter** rapidly generates reports directly from the Intergraph application
- The software allows to search for component tags, also across applications

Next steps:

If you believe that **FreeReporter** may be of value to your organisation, please download your free to use software today from www.caxperts.com, and let us know how you get on with it.
